LinkedIn: www.linkedin.com/in/rahul-gupta75 +91-9117749984

## SKILLS

- **Programming**: Python, C++ (DSA)
- **Frameworks/Database**: Django, MySQL, Scikit-Learn, TensorFlow, PyTorch, FlaskAPI, Tailwind CSS
- **Platforms/Tools**: Git & GitHub, Ubuntu, Excel (Data handling), Jupyter Notebook,Cisco Packet Tracer
- **Soft Skills**: Problem Solver, Creative thinker, Self-Learning & Adaptability, Technical Communication

## PROJECTS

- **Smart Energy Consumptions** *Jan. 2026*

  *Infosys Machine Learning Project*

  – Aimed to build an energy consumption prediction website with 90% improved accuracy.
  – Implemented reliable machine learning model with multiple model like Random Forest,linear Regression.
  – Achieved a stable, high-performing ML model's site that can resolve the awareness about the saving energy consumption.
  – Tech: Python, scikit learn, FlaskAPI, Gemini 2.5 Flash Lite, datasets(Energy consumption.csv)

- **Campus Kart** *Feb. 2026*

  *Python Full Stack Django Project*

  – Built a full-stack campus marketplace using Django and Python with multi-user product listing, authentication, and admin analytics
  – Implemented secure authentication, product management and admin analytics to automate marketplace operations.
  – Achieved a scalable Django-based campus marketplace with efficient product, user, and admin management.
  – Tech: Python, Django, HTML, CSS, JS , SQLite3

- **AI-Based Skill Assessment & Career Guidance Bot** *Oct. 2025 - Dec. 2025*

  *LLM-Powered Career Counseling System*

  – Aim to design a chatbot that assists students in identifying suitable career paths and required skill sets.
  – Architecture of multi-turn stateful conversational pipelines with AI reasoning, scoring logic, and secure webhook-based deployment.
  – Achieved personalized career roadmaps and accordingly data-informed skill feedback for users.
  – Tools: Python, Gemini, Telegram API, REST, JSON.

## TRAINING

- **Infosys Springboard** *Nov. 2025*

  *AI & Machine Learning Intern | Virtual*

  – Performed data cleaning, preprocessing and EDA to prepare datasets for ML pipelines and guide model selection.
  – Built and evaluated ML models using Python, TensorFlow, Keras and Scikit-Learn to optimized performance through feature engineering and hyperparameter tuning.
  – Developed NLP workflows for sentiment analysis and text classification using NLTK, SpaCy, TF-IDF and word embeddings.
  – Delivered weekly progress presentations, collaborated in virtual teams and maintained clear documentation to ensure smooth project execution.

## CERTIFICATIONS

- **Full Stack Web Development With Game and Application**, | Udemy *July. 2025*
- **LLM Pentesting**, By Armaan Sidana | Udemy *Sept. 2025*

## EDUCATION

–**Lovely Professional University**, Punjab, India *August. 2023**
Bachelor of Technology - Computer Science and Engineering; | ***CGPA: 7.1***

–**Ramawtar Ramdev College**, Sheohar, Bihar, India *June. 2020 - March. 2022*
Intermediate; | ***Percentage: 69%***

–**D.A.V Public School**, East Champaran, Bihar, India *April. 2020*
Matriculation; | ***Percentage: 72%***
